

Asadbek Mirtazayev

Backend Engineer | Los Angeles, USA

github.com/mirtazayev

mirtazayev.2004@gmail.com

Python, FastAPI

Summary

As a backend engineer, I enjoy using Python and FastAPI to automate processes, create scalable APIs, and speed up systems. I've increased data accuracy, made code easier to maintain. I also like to write about problem-solving and distributed systems, sharing what I discover in the process.

Experience

Backend Engineer (Contract) | Chicago, IL | Nov 2023 – Feb 2024

- Developed scalable backend services for the transportation management system
- Conducted comprehensive testing for web APIs to ensure functionality and reliability
- Code was rewritten to follow clean code guidelines, which improved readability and maintainability.

Freelance Backend Engineer | Remote/Tashkent, UZB | Jan 2023 – May 2023

- Python-based web scrapers (Beautiful Soup/Scrapy) to collect and normalize data from 15+ sites.
- I wrote a Python style guide that has been used by more than ten independent developers.
- Built Telegram bots to automate notifications and enable user engagement
- Designed FastAPI-based APIs for smooth data delivery to partner applications

Projects

TripMeetup.com API Parser, Tool for Aggregating Event Data

Built with Python to consolidate travel event data across sources, in use by 200+ platforms

Processes high-volume requests efficiently, improving data accuracy and access

Education

Drake University *B.Sc. Computer Science*

Focus area on Algorithms and Data Structures, Object-Oriented Programming, Design Principles

Overall GPA: 3.5/4.0

Technical Skills

Languages: Python, C++, SQL

Frameworks/Libraries: FastAPI, Django, SQLAlchemy, BeautifulSoup, Scrapy, pytest

Tools: Docker, Git, Redis, PostgreSQL, Telegram Bot API

Concepts: REST APIs, OOP, Algorithms, Memory Optimization, Distributed Systems, Data Analytics

Activities

Own a bi-weekly tech blog at mirtazayev.com, which has 250+ monthly readers

Built fault-tolerant, distributed systems with a focus on scalability and problem-solving
